

WEBINAR

TORSDAG DEN 6. MAJ KL. 14.00

Mød AI og Edge eksperterne på webinaret

Bring AI to the Edge with AAEON Solutions

Iris Huang
Product Sales Manager
hos AAEON

Owen Wei
AI & IOT Product Solution
Manager hos AAEON

Presenter: Iris Huang (irishuang@aaeon.eu),
Owen Wei (owenwei@aaeon.eu)

1956 DARTMOUTH

Artificial Intelligence (AI) Coined at Dartmouth

1956

A PROPOSAL FOR THE
DARTMOUTH SUMMER RESEARCH PROJECT
ON ARTIFICIAL INTELLIGENCE

J. McCarthy, Dartmouth College
M. L. Minsky, Harvard University
N. Rochester, I. B. M. Corporation
C. E. Shannon, Bell Telephone Laboratories

In 1956, a small group of scientists gathered for the Dartmouth Summer Research Project on Artificial Intelligence, which was the birth of this field of research.

OS

Why AI at the edge matters?

With the explosive growth of connected devices world wide, combined with a demand for **Bandwidth** **Privacy/Confidentiality**, Low Latency, **Availability** constraints, AI models trained in the cloud increasingly need to be run at the edge.

BANDWIDTH

1 billion cameras WW (2020)
10's of petabytes per day

LATENCY

30 images per second
200ms latency

PRIVACY

Confidentiality
Private cloud or on-premise storage

AVAILABILITY

50% of populated world < 8mbps
Bulk of uninhabited world no 3G+

Surveillance

Smart surveillance understands what it sees and reacts to it.

Agriculture

Smart Agriculture solutions can increase the yields per m² & enhance sustainability in livestock and land.

Smart City

Edge computing nodes consolidated data streams from environmental sensors.

Robotics

Helping to reduce the workload of human and performing more intelligent tasks.

Industrial

Develop smart cameras to enhance the efficiency of quality control.

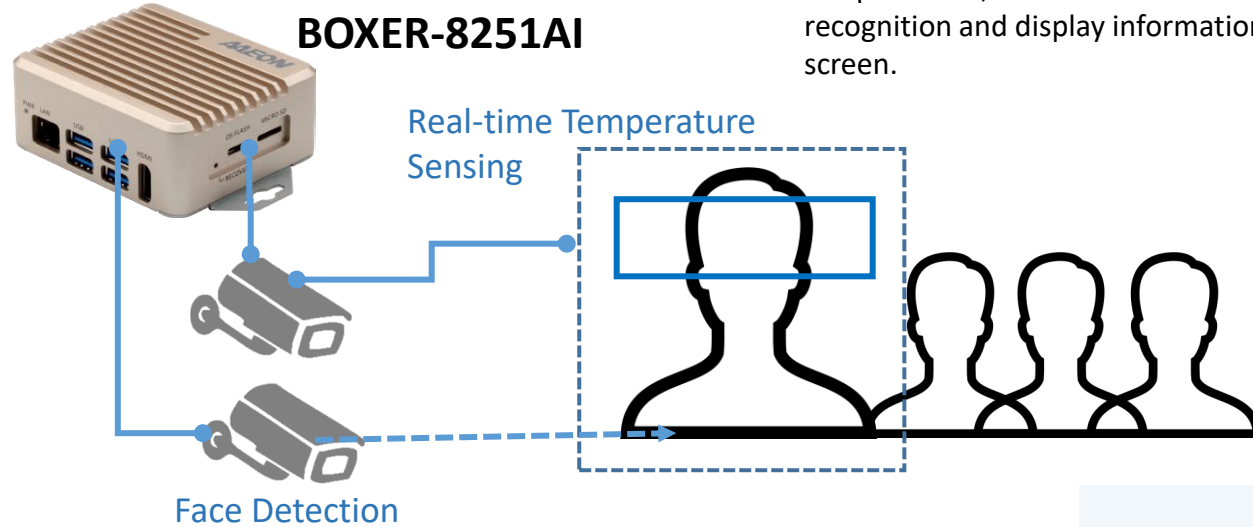

Retail

Improve insight on customer preferences by analyzing demographics and behaviors.

<https://solutions.aaeon.com/>

Infrared imaging systems

Use an infrared camera to check body temperatures, the other camera for face recognition and display information on screen.

□ Features

Efficient

Up to 20 simultaneous scans with advanced facial detection algorithm

Quick Hotspot Detection

Less than 0.3 seconds

Unlimited Hotspot Detection & Tracking

Scans multiple faces at once, with no distraction by other heat sources and no crowd interference.

Accurate

Accuracy levels of >95%

Rapid Deployment

Easy installation, light weight

Mask Detection

Social Distance

Sneeze Detection

People Counting

Body Temperature Monitoring

Thermal Detection

Video Analysis

The needs for retailers to look for ways to optimize the in-store experience and the sales strategy are getting urgent. Through AI analytic power, smart retail can do customer analysis, brand analysis and inventory monitoring in order to provide better efficiency and insights for boasting sales and optimizing customer experience.

BOXER-8250AI

Our BOXER-8240AI linked to the cameras to identify the images of the field in real time, and only spray herbicides on the weeds.

The software constantly gather of new field data from farms around the world, enables the software update new types of weed data to system to continuously improve the precision of the system.

Weed Recognition

Disease Detection

FLEET MANAGEMENT

Thanks to advanced artificial intelligence, forklift with advanced algorithms can monitor and prevent warehouse accidents, protect operators, nearby employees, products and building infrastructure.

Safety Analytics
Where, who, how

- Pedestrians Detection
- Objects Detection
- Path Planning
- Collision Prevention
- Risky Behavior Detection

Automatic Forklifts

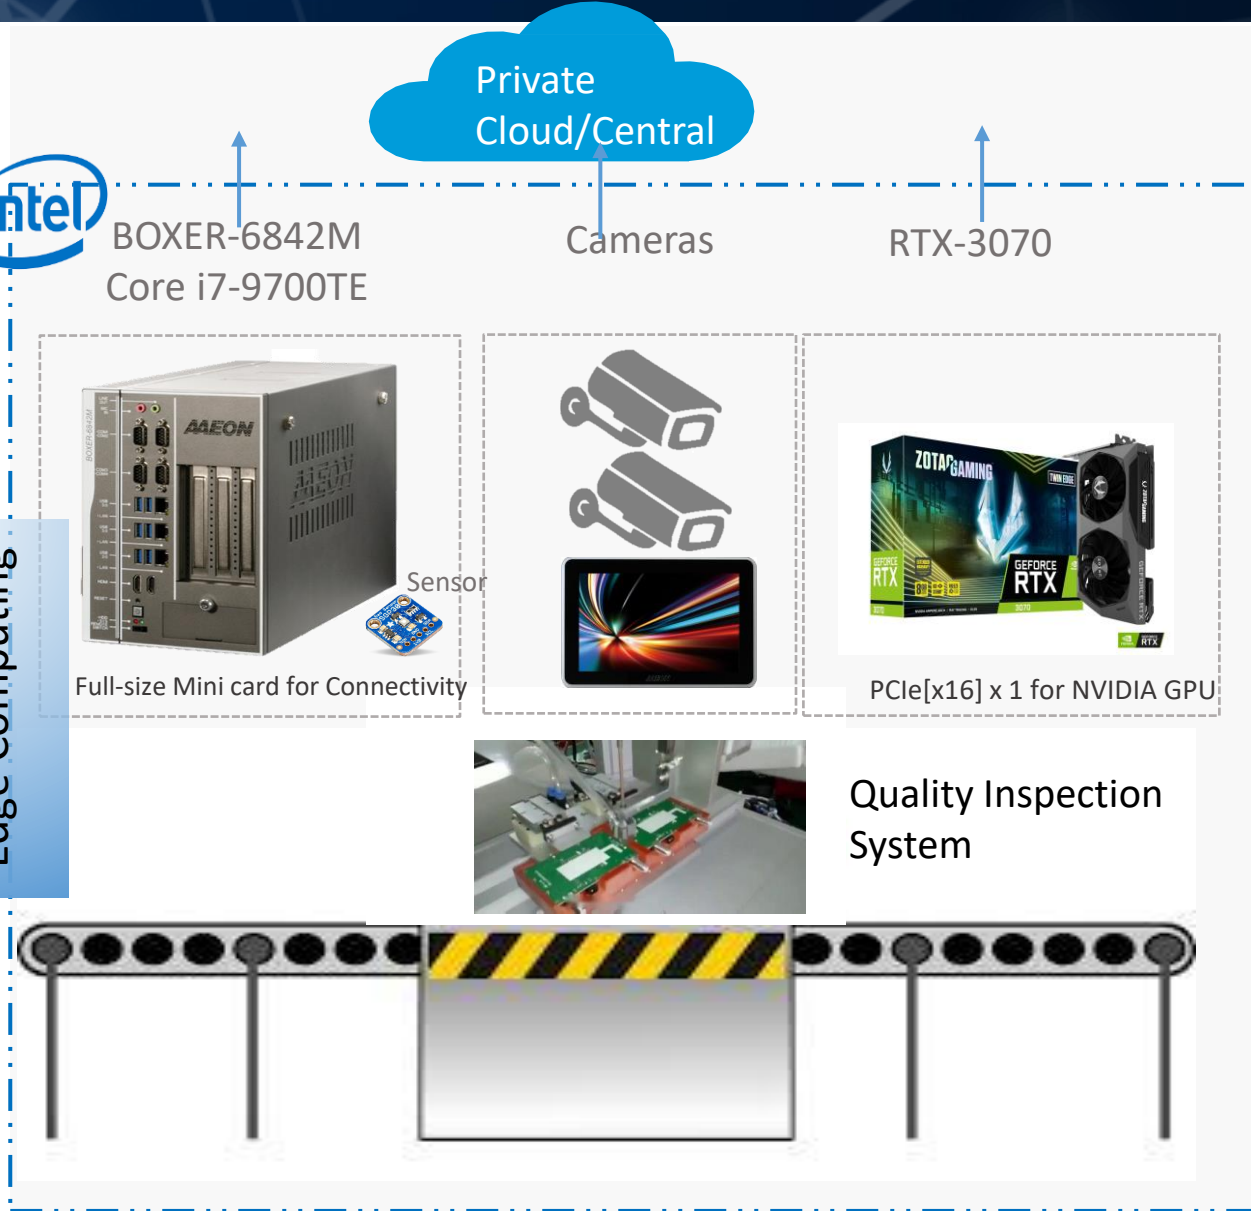

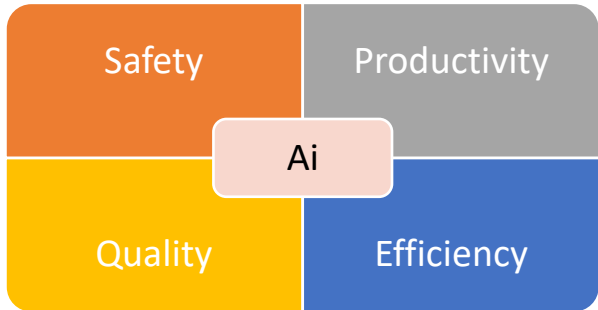

Automated Optical Inspection(AOI) is a common method highly rely on operator experience and complicated rules setting, not able to do self learning, incapable of classify defect types, more over, higher labor cost and often misjudge...

With Artificial Intelligence..

- Auto classify defect types
- Self learning new defect types(Deep Learning)
- High Accuracy and Precision
- Lower Labor Cost
- Shorten Defect judgement time

95%
Accuracy of defect classification
95%↑

Edge Computing

Why AAEON @ Edge Solutions

AAEON AI@ Edge Solutions

AAEON works closely with our clients and partners to help develop hardware solutions for their Artificial Intelligence applications. With our OEM/ODM support, AAEON is the hardware partner you're looking for to bring AI projects to life.

Wide-Range Temp

-20~50°C

Fanless

Wide-Range power

9~24V

Aluminum Die-Cast/
Intrusion Mold

Wireless

- Wireless technologies support

Customization

- Customized System/board Design

IP Protection Class

- IP40/IP66/IP67/ IP69K
- Water / Dust – Proof
- Industrial-Garde Rugged Design

NVIDIA Partner Network (NPN)

Jetson Partner Hardware Products

Embedded hardware is complex, requiring a deep knowledge of embedded system development and AI. Our ecosystem partners can support subsystem designs all the way up to fully realized autonomous machines with their associated requirements. Their products and systems are optimized for AI-at-the-edge applications, with a single goal of enhancing time to market.

The table below was created to help customers identify the right subsystem and partner for their needs, listing hardware systems built on and fully supported on the NVIDIA Jetson Platform. These systems are designed for either board or other a rich number of I/O including MIPI, DMSI, Ethernet, USB, HDMI, M.2, M.2 NVMe, SD, PCIe, and more. Fully assembled products can be used on edge microservers, AEC based and other applications.

Partner	Hardware Solution	Model	Supported Jetson	USB Ports	Ethernet Ports	Cooling System	Camera (MIPI)	Other Interfaces
AAEON	Full System	B080R-0250M	Jetson NX	4	1	Fanless	—	HDMI, 2x UART, M.2
AAEON	Full System	B080R-0250M	Jetson NX	4	1	Fanless	—	HDMI, M.2

Cost Effective

Multi-Control I/O

OS Support

- Compatible with Ubuntu OS
- The most update NVIDIA JetPack SDK
- ACLinux/NVIDIA Ubuntu is free license fee.
